## Projects

---

### Zedex website

- Developed a visually appealing and user-friendly landing page for Zedex, an online platform designed to assist users in maximizing their study sessions. The project aimed to promote efficient learning and provide easy access to study tools.
- Tools used: HTML, CSS

### Youtube clone website

- This YouTube clone mimics the basic design elements and layout of the YouTube platform, including its navigation bar, video thumbnails, video details, and a mock-up of the video player interface. The project showcases the application of responsive design principles to ensure that the website adapts seamlessly to different screen sizes and devices
- Tools used: HTML, CSS

### Eighteen plus Automotive

- The goal of this project is to build a clean, responsive, and visually appealing eighteen plus website that allows users to learn about the Automotive, its services, membership plans, and more. The website will be designed using **HTML , CSS and BOOTSTRAP** focusing on creating an attractive and user-friendly interface.I have seen the Instagram page with that details I developed website for them.
- Tools Used:HTML, CSS , BOOTSTRAP

## Technologies

---

**Languages:**Html,Css,Bootstrap,JavaScript

**Tech tools:**VS Code,Codepen,Github

## Support Skills

---

Strong problem-solving abilities in debugging and resolving issues quickly.

Efficient in understanding and communicating technical information to clients and non-technical stakeholders.

Proficient in diagnosing and solving application issues through voice, email, and chat-based support

Experienced in providing troubleshooting assistance for both software and hardware-related issues.

Skilled in documenting and tracking support requests, ensuring accurate records and timely follow-ups.
